Medication Intelligence™

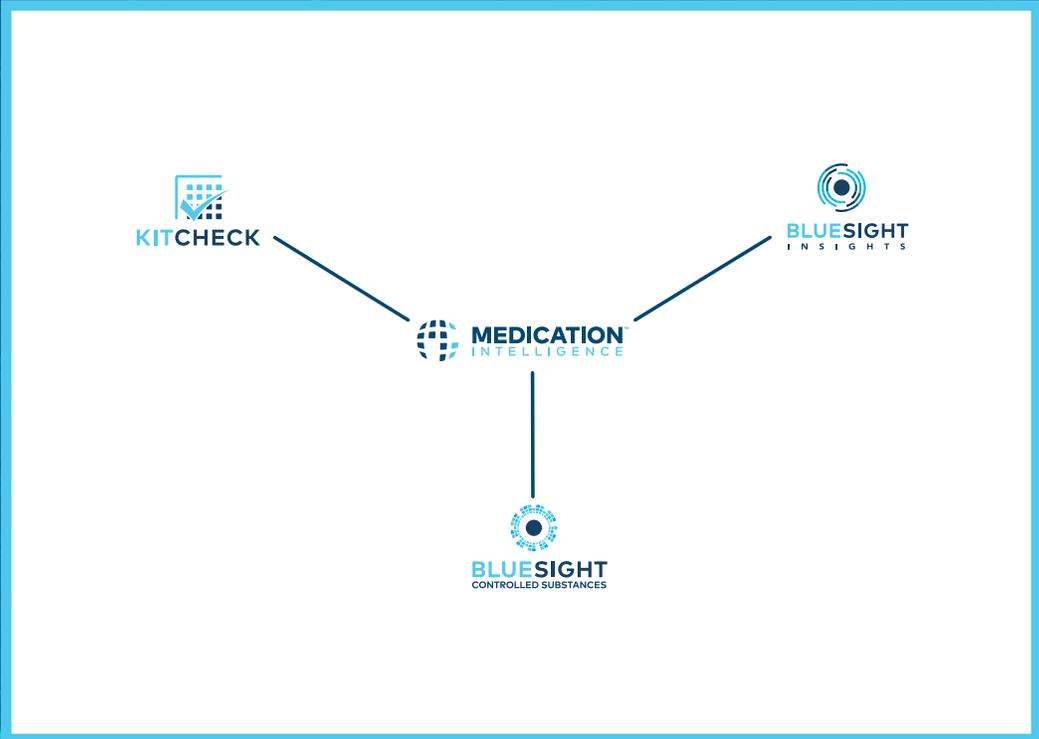

Integrated Solutions.
Bringing Simplicity,
Visibility and Predictability
to a World of Care.

KITCHECK

POWERED BY BLUESIGHT

The Power of Medication Intelligence Across Systems

At Kit Check, we believe that tomorrow's innovation comes from thoroughly understanding the challenges of today. This solution-oriented business model helps hospital pharmacies proactively gain visibility and control of medication management and distribution, as well as optimize their procedures. Our core focus is designing and developing tools that create and implement safer, more compliant, and more efficient processes in hospital pharmacies, with an overarching goal of helping hospitals to better serve their patients and communities.

Simplicity

Using automation to simplify complex processes that help to reduce time, costs and risks across the pharmacy supply chain —ensuring patients get the best care at the right time, every time.

Visibility

Promoting powerful, accurate tracking technology through machine learning and advanced analytics that help everyone make smarter decisions that improve patient care.

Predictability

Providing actionable data through automated reports, dashboards and analytics, enabling stakeholders to make smart, timely decisions that reduce costs, risks and waste while improving access.

*Industry-Leading, RFID Solution Delivering
Simplicity, Visibility and Predictability to
Medication Management.*

Kit Check is an automated medication inventory management system designed to help hospital pharmacies gain better visibility into their medication usage lifespan, increase efficiencies, and free up staff to focus on patient care.

Continuous Oversight of Every Medication Throughout the Entire Drug Chain of Custody. That's the Kit Check Difference.

Kit Check Benefits:

- Improve Efficiency
 - Kit Check has been proven to reduce medication restocking time by 72-96% and supports multiple pharmacy workflows
- Eliminate Errors
 - Reduce medication restocking errors to zero through RFID-enabled hospital inventory automation
- Increase Visibility
 - Accurate, item level visibility can save you the time it usually takes to process a recall and allows your team to quickly complete an operational assessment
- Decrease Costs, Invest in Patient Care
 - Prescriptive analytics pinpoint opportunities to reduce medication costs and increase revenues

Simplicity

A key offering of Kit Check is the delivery of pre-tagged products directly to your pharmacy to simplify manual labeling and RFID tag expense.

Visibility

Provides product visibility at a granular, unit-of-use level, and ensures that tags are readable to the Bluesight platform for immediate use.

Predictability

Your pre-tagged and standard RFID medications provide access to the Bluesight platform for cGMP-relevant data to help manage recalls, returns, expiry and partner network collaboration.

BLUESIGHT
CONTROLLED SUBSTANCES

The #1 rated drug diversion monitoring solution

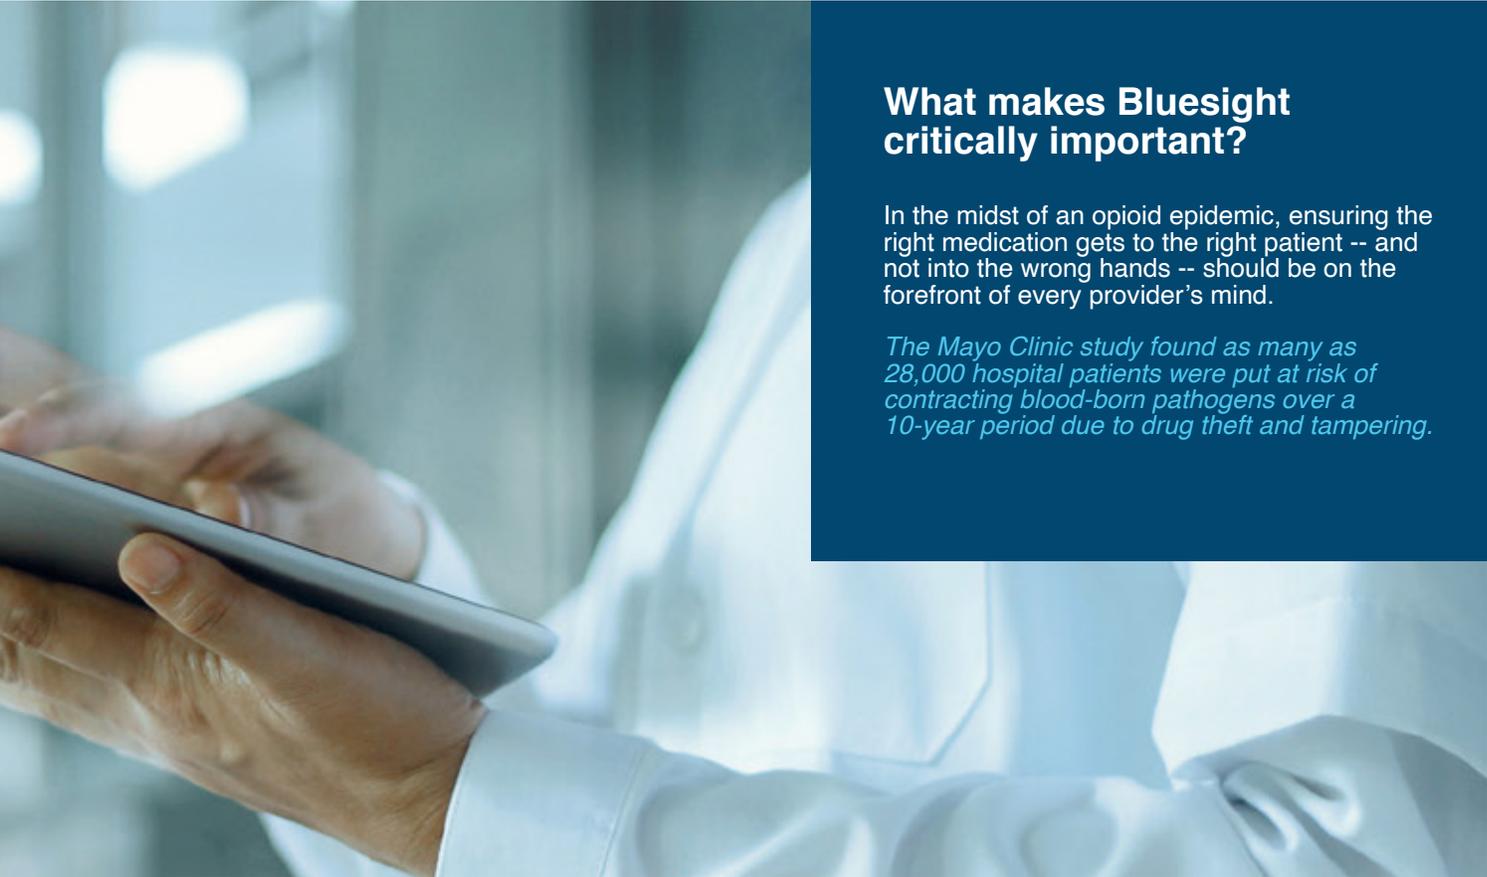

Increase Visibility. Decrease Risk.

Bluesight for Controlled Substances is the most comprehensive controlled substance tracking and diversion detection solution offering complete coverage of the OR, nursing floors and other procedural areas. By increasing visibility through machine learning analytics, Bluesight is able to track controlled substances throughout the distribution chain, thereby reducing risk. Our software provides key insights that enable compromised caregivers to be identified early and assist them in getting the help they need.

Protect your patients, staff and facility from the damaging effects of diversion. Bluesight for Controlled Substances makes medication intelligence possible through a diversion approach that guides hospital pharmacies toward aggregate data and risk mitigation.

What makes Bluesight critically important?

In the midst of an opioid epidemic, ensuring the right medication gets to the right patient -- and not into the wrong hands -- should be on the forefront of every provider's mind.

The Mayo Clinic study found as many as 28,000 hospital patients were put at risk of contracting blood-borne pathogens over a 10-year period due to drug theft and tampering.

Simplicity

We understand that every resource in the pharmacy supply chain is precious. Bluesight for Controlled Substances eliminates the time-consuming and manual tasks of reconciling controlled substance medications and the time to identify and investigate diversion. Bluesight for Controlled Substances makes complying with internal, local, and federal guidelines as well as reporting out on controlled substance usage easy.

Visibility

Bluesight for Controlled Substances increases visibility into controlled substance documentation, driving compliance and decreasing medication errors driving better clinical care and reducing patient harm.

Predictability

Multiple data sources are utilized to provide a streamlined and comprehensive look into controlled substance activity so you can be confident in the accurate identification of diversion behavior.

Fully Automated Software Solution

Enhance the Way
Your Pharmacy Manages
Supply Chain Technology,
People, and Processes

Our easy-to-implement solution gives you actionable insights into your supply chain to optimize spending, maximize compliance, and save money.

Our newest Medication Intelligence™ solution, Bluesight Insights delivers an easy to install, fully automated solution that streamlines the pharmaceutical supply chain process. Helping you stay on top of rapidly shifting drug prices, supplies, and regulations, Bluesight Insights provides holistic visibility into the supply chain — so you can reduce costs and keep your hospital well stocked.

Simplicity

Simplifying pharmacy stocking through real-time insights into drug pricing, drug availability, GPO compliance and 340B regulations —helping you make smart decisions that benefit your hospital.

Visibility

Providing holistic visibility into the full breadth of available medications to help you make informed decisions that will optimize your inventory and budget.

Predictability

Uncovering the complete pharmaceutical supply chain, so you can better understand and anticipate your hospital's needs —thwarting challenges before they arise and making strategic decisions at every turn.

Choose Medication Intelligence.

Tie disjointed pieces of your hospital operations together with an elegant and intelligent software portfolio, as well as a team of dedicated experts to help you onboard and optimize.
